

Supplementary Materials

Attachment 1. Characteristics of macroscopic identification of *Microporus sp1*

Attachment 2. Characteristics of macroscopic identification of *Microporus sp2*.

Attachment 3. Characteristics of macroscopic identification of *Tatraea sp.*

Attachment 4. Characteristics of macroscopic identification of *Ganoderma sp.*

Attachment 5. Characteristics of macroscopic identification of *Picipes sp.*

Attachment 6. Characteristics of macroscopic identification of *Russula sp1.*

Attachment 7. Characteristics of macroscopic identification of *Russula sp2.*

Attachment 8. Characteristics of macroscopic identification of *Phillipsia sp.*

Attachment 9. Characteristics of macroscopic identification of *Laetiporus sp.*

Attachment 10. Characteristics of macroscopic identification of *Phellinus sp.*

Attachment 11. Characteristics of macroscopic identification of *Tyromyces sp.*

Attachment 12. Characteristics of macroscopic identification of *Polyporus sp.*

Attachment 13. Characteristics of macroscopic identification of *Pholiota sp.*

Attachment 14. Characteristics of macroscopic identification of *Trametes sp1*.

Attachment 15. Characteristics of macroscopic identification of *Trametes sp2*.

Attachment 16. Characteristics of macroscopic identification of *Mycena sp*

Attachment 17. Characteristics of macroscopic identification of *Crepidotus sp*.

Attachment 18. Characteristics of macroscopic identification of *Earliella* sp.

Attachment 19. Characteristics of macroscopic identification of *Phellinopsis* sp.
